Please take note:

Do not mount the lamp directly above a sauna stove - risk of overheating!

If a wrong hole is drilled by mistake, please do not fix it on your own, but give us a call.

Unauthorized modifications or changes of any nature during the installation process (other than explained here) are prohibited because they can lead to malfunction.

Handle with care.

FL2000

Installation Instruction

1. Cut out the rectangular profile **a** in a size of 13,6 x 10 inches at the desired spot.
2. Mount the loose end of the safety cable **b** with the included screw at the middle of the broad side of the cut.
3. Plug in the power supply cable into the diode.
4. Press the Color Light Unit into the cut from below.
5. Plug the power supply unit into the mains socket.
